

COMMON **GRACE** AOTEAROA

How do we think about community and global engagement on the environment as Christians?

The mission of the Church is the mission of Christ:

- To proclaim the Good News of the Kingdom
- To teach, baptise and nurture new believers
- To respond to human need by loving service
- To **transform unjust structures of society**, to challenge violence of every kind and pursue peace and reconciliation
- To strive to safeguard the integrity of creation, and sustain and renew the life of the earth

**2021-2022:
Young Anglicans
established the
'Free Fares
Campaign'**

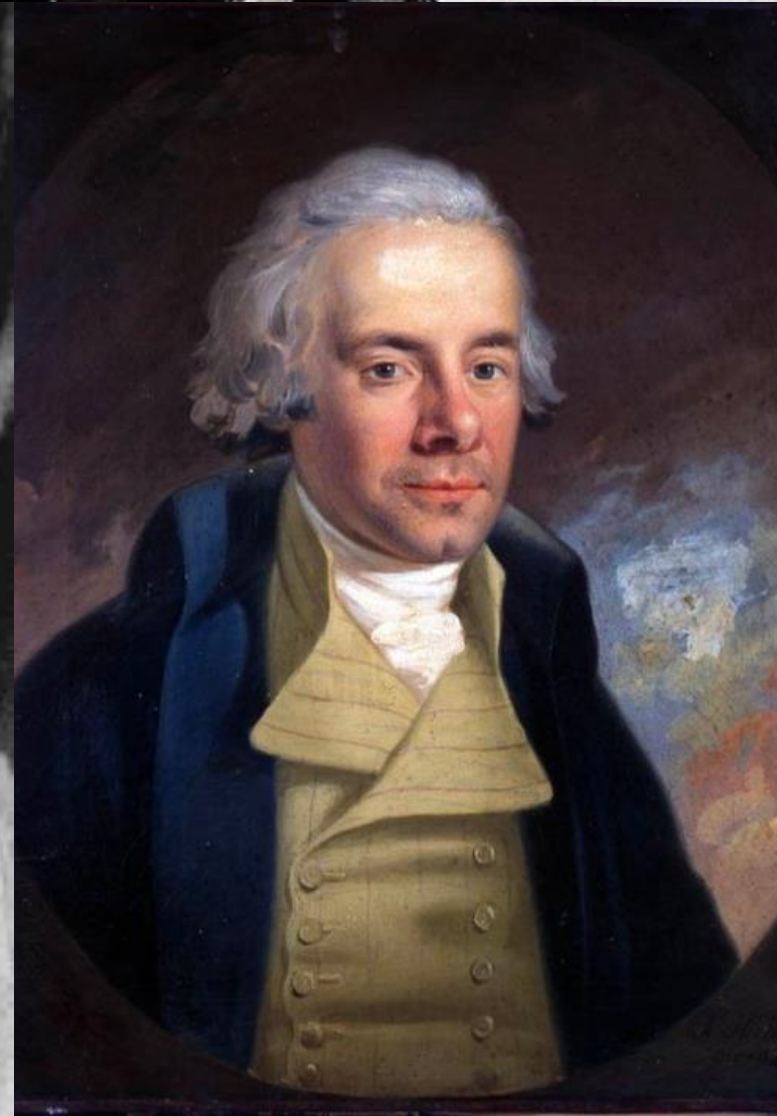

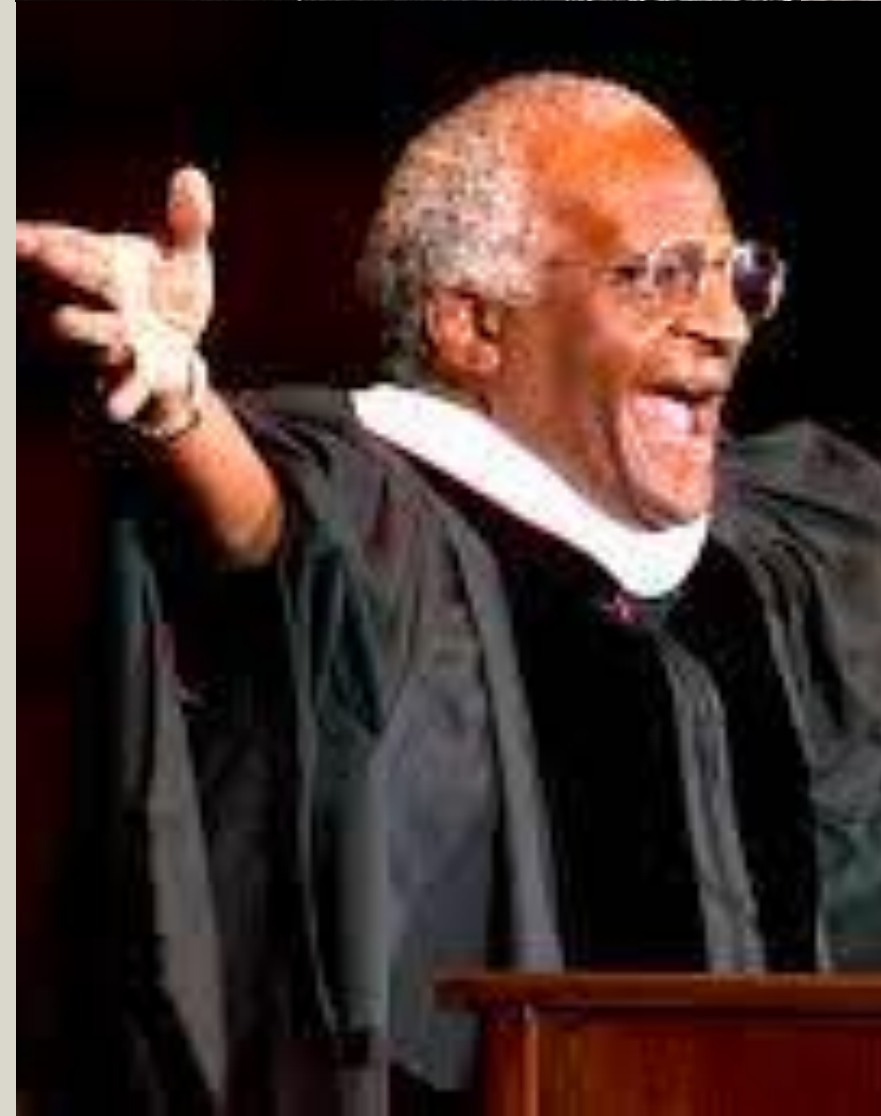

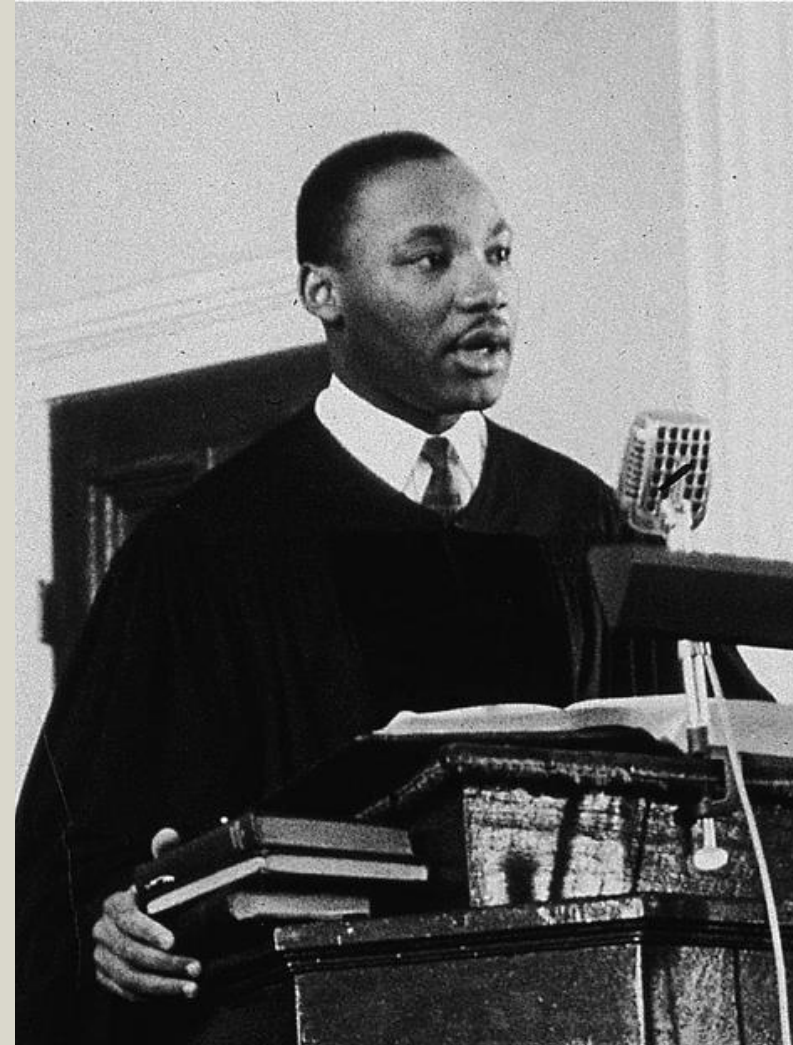

BUDGET 2023 ●

Budget 2023: Children get free public transport, under 25s get 50 percent discount

We are inspired by
Christian campaigners
abroad

**And non-violent
resistance in
Aotearoa**

COMMON **GRACE** AOTEAROA

To equip and organise followers of Jesus across Aotearoa to transform unjust structures for the common good.

We do this by mentoring groups of passionate Christians to run advocacy campaigns alongside the wider community and civil society that advance policy solutions towards climate, economic and Te Tiriti justice.

Our Christian faith will influence our motivation and our method

We will use Christian narratives to motivate a new group.

We will choose campaigns that benefit the 'last, lost and least'.

Our tactics will emulate the example of Jesus.

How it's going

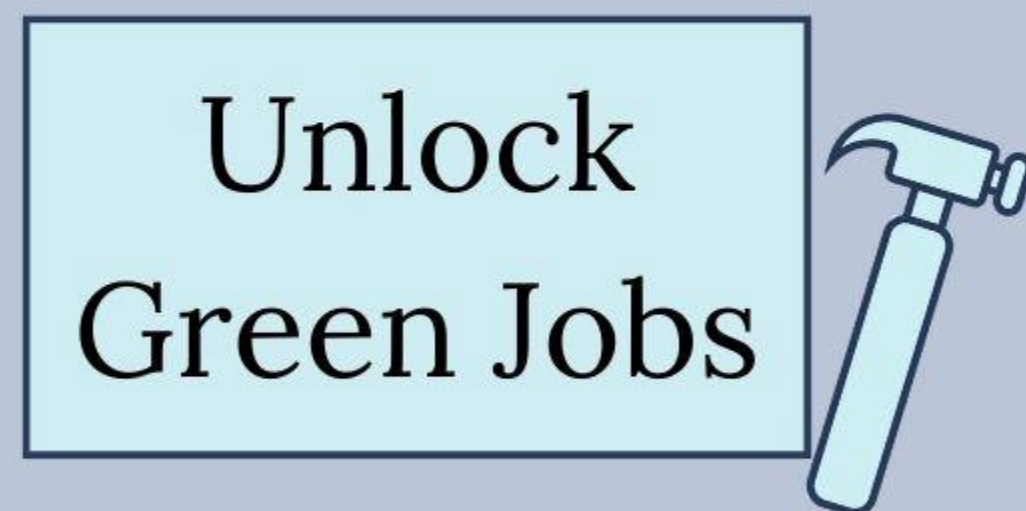

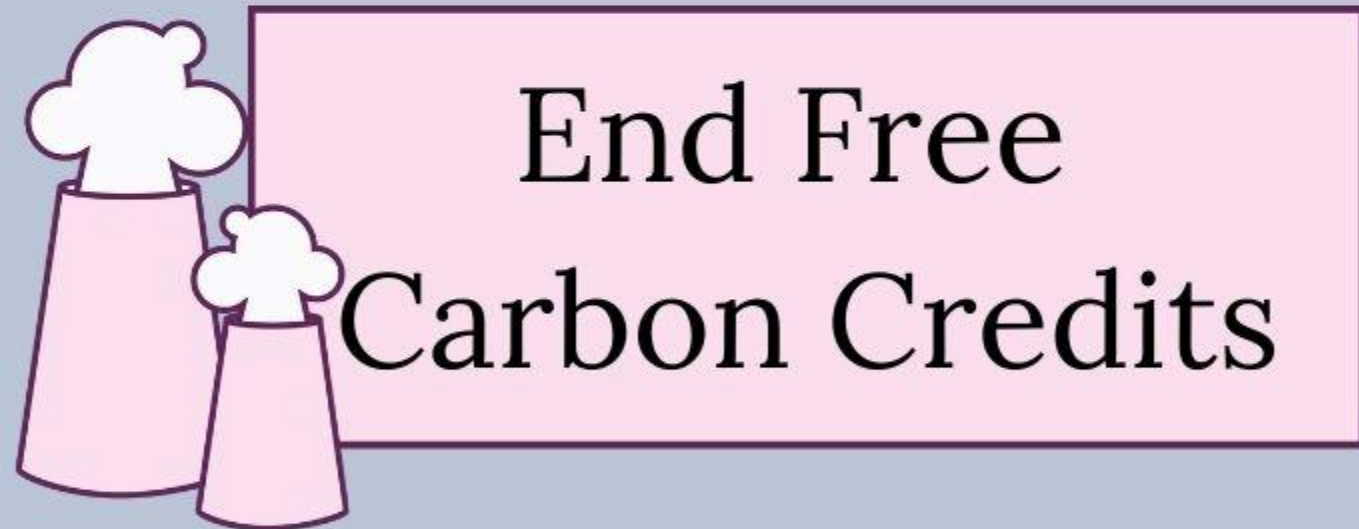

DON'T SUBSIDISE POLLUTION

End Free Carbon Credits

Cut Pollution

Unlock Green Jobs.

What we're calling for

End Free Carbon Credits

Accelerate the phase out of free industrial allocation in the Emissions Trading Scheme to end free credits by 2030.

End Free Carbon Credits

1. Increase the industrial allocation phase out rate to 14% per year starting 2025 to reach zero free credits by 2030
2. Reduce the emissions cap by half of the equivalent reduction in freely allocated units
3. Auction the other half of emissions units no longer freely allocated to generate revenue for reinvesting in climate action

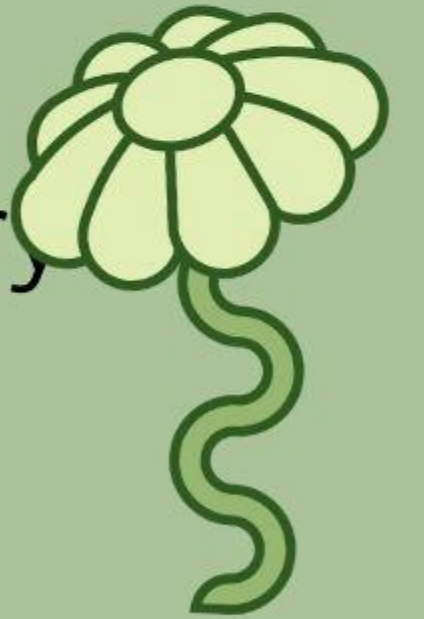

Cut Pollution

Put funds from ending free credits into upfront costs of decarbonising emissions-intensive industries

Cut Pollution

1. Use revenue from extra auctioned NZU's to co-fund up-front decarbonisation options for Emissions Intensive and Trade Exposed businesses where available to help keep jobs in place and clean up industries
2. Link investments to credible emissions reduction outcomes, and in response to verifiable, ambitious industry decarbonisation plans.

Unlock Green Jobs

Protect jobs, and fund a just transition for affected workers, with a Carbon Border Mechanism and green infrastructure investment

Unlock Green Jobs

1. Introduce a Carbon Border Adjustment Mechanism on imports for industries vulnerable to emissions leakage (phased in from 2025 to be fully in place by 2030).
2. Maintain demand for locally produced steel, concrete and wood processing through sustainable infrastructure investment.
3. Government to fund just transition plans and involve workers where decarbonisation options aren't available, in line with a just transition.
